

How change the color of a template in TerraFlex.

- 1) Open the Trimble Map Workspace in Trimble Connect Project
- 2) Find the template you would like to change the color on in the Layers tool
- 3) Right click on the template and choose Edit Style
- 4) Change the color and save it
- 5) On the mobile device, run the TerraFlex application, open your TerraFlex project and the updated color for your template should show up.
